

Natural Stone... We insist

Natural Stone ... We insist

**MAXI STONE
SDN. BHD.**

Company profile

Incorporated in 1997, Maxi Stone Sdn. Bhd. is one of Malaysia's largest importers of quality natural stone products. With a vision to provide natural stones to the 'concrete' lifestyle of city folks, we provide a comprehensive range of products so that the city lifestyles would also be complemented with a touch of natural beauty.

For the past 10 years, Maxi Stone's everlasting products have added beauty and elegance to indoor and outdoor building surfaces. They are manufactured under rigid specifications, strict aesthetic and technical quality control.

We help you to enhance your home, office or industrial buildings and properties with natural stone products. Our wide variety of products include building stones, landscapes stones, stone-care products, slate, basalt, sandstone, cabbie-stone, granite, pebbles and also river stones. At Maxi Stone, we insist on enduring beauty of natural stones. In fact, many of our products have become the most popular home furnishing materials.

Natural stone brings a timeless beauty to any building or landscape through color, texture and durability. Your property values will certainly be increased and maintenance cost decreased with use of natural stone.

Our range of broken paver is perhaps the largest source in Malaysia with materials from quarries in China, Indonesia, Philippines, Germany and India, offering different surfaces, sizes, thicknesses and edges to suit all home renovation needs.

In view of market demand of convenient stone cladding, Maxi Stone has developed an easy stone cladding system known as MEXX Stone Cladding System.

At Maxi stone, we are committed to providing our customers with accurate and timely technical support to ensure that the customer will maximise the value of the products that they purchase. Quality and customer service are our foremost concerns. We employ the most efficient and modern machinery to process the stones. We follow rigid quality control procedures, from the quarrying stage to the packing stage.

We dedicated to total customer satisfaction. Our products can conveniently be matched to other premium building materials & can be imaginatively laid out in exquisite patterns & innovative color combinations for dramatic effect. Our products quality updated with high level of professionalism of the mason, who are kept up to date by means of external & internal training courses that guarantee product quality.

All of our friendly and helpful sales personnel are available to our customers, offering recommendations and assistance to address any technical issues that may arise with the use of our products.

Whether you are home owner thinking of renovating your own home; an architect looking for floor or wall covers for commercial premises; a designer seeking to decorate a house or apartment or a contractor planning to build a swimming pool, Maxi Home can make your job much easier.

To meet the market's requirements of stone cladding, we developed an easy stone cladding installation system called MEXX Stone Cladding System. Its maximum-weighted Stone Cladding System is approximately 40-70 kg per square meter for fast and low installation costs per unit, increased work efficiency, reduced projects handover periods and other efficiency improvements. MEXX Stone Cladding System is ideal for feature walls, pool surrounds, courtyards and entertainment areas. Equally well suited for indoor use, these stacked stone panels are also perfect for the creation of water features, especially when illuminated to highlight color variations.

GRANITE PAVER

Cobble stone is used for heavy duty, romanized designs on your driveways, walkways, patios and gardening areas. The 3 main characteristics of granite rock are: Hardness, durability and aesthetics. They are the primary reasons which make granite pavers perfectly suited for architectural landscaping and pavement applications. We have a wide selection of sizes, colors and various surfaces to suit your every need.

MEXX PEBBLE PLASTER

Mexx Pebble Plaster – a decorative wall finishing, based on natural pebbles and gravels, for coating interior and exterior surfaces such as rendered mortar, concrete, prefabricated panels (GRC, FRP, ..., etc). Gypsum plasters, wood and its agglomerates. It has outstanding characteristics of elasticity to follow slight movement and setting of structures as well as being an excellent water repellent. Its resistance to abrasion, erosion by acid or alkali, shock, stressing climatic cycles and UV rays show more eminent performance than other coatings. Its special formulation also gives a dirt retention surface which is easily washable.
